

How we can help you be green

Recycling plastic is something we have been doing for more than 25 years. Green ethics are in our DNA. It's why our logo is green. It's why we can help companies like yours look at recycling more effectively. And why we can help you meet your green obligations by recycling and reprocessing your scrap plastic, in one of the most modern facilities in the UK.

Our products, processes and services

We are very proud to have earned an outstanding reputation in the industry for producing very high quality reprocessed compound, agglomerate and granulate. We don't cut corners. We use the very best technology, including EREMA's super efficient and patented recycling system. This allows us to collect and reprocess most types of pp/pe waste which is then re-used in a wide range of products such as; plant pots, paint trays, car bumpers, plastic decking and furniture etc.

We also offer a professional Toll service including granulation, agglomerating, and compounding. We have the capability to reprocess all forms of waste, in all shapes and sizes. Our finished products can substitute your prime virgin materials or be used in a blend to reduce your raw material cost. Your waste will genuinely become something useful.

Support and advice when you need it

In today's more eco-aware world there are ever-increasing government standards to be met. But because we have unrivalled experience in the industry, we can pass our hard earned knowledge on to you.

The Producer Responsibility Obligations (Packaging Waste Regulations) 2007, set objectives for British industry for the recovery and recycling of packaging waste. We can help you conform to the regulations required, increasing your recycling capacity and improving your margins. Preston Plastics Ltd will work with you to ensure your legal responsibilities can be met as efficiently and cost effectively as possible.

And because we are an accredited re-processor, we have authorisation to issue PRN certificates (Packaging Recovery Note certificates). Another way we can help businesses meet their ethical obligations.

We pick-up and drop-off

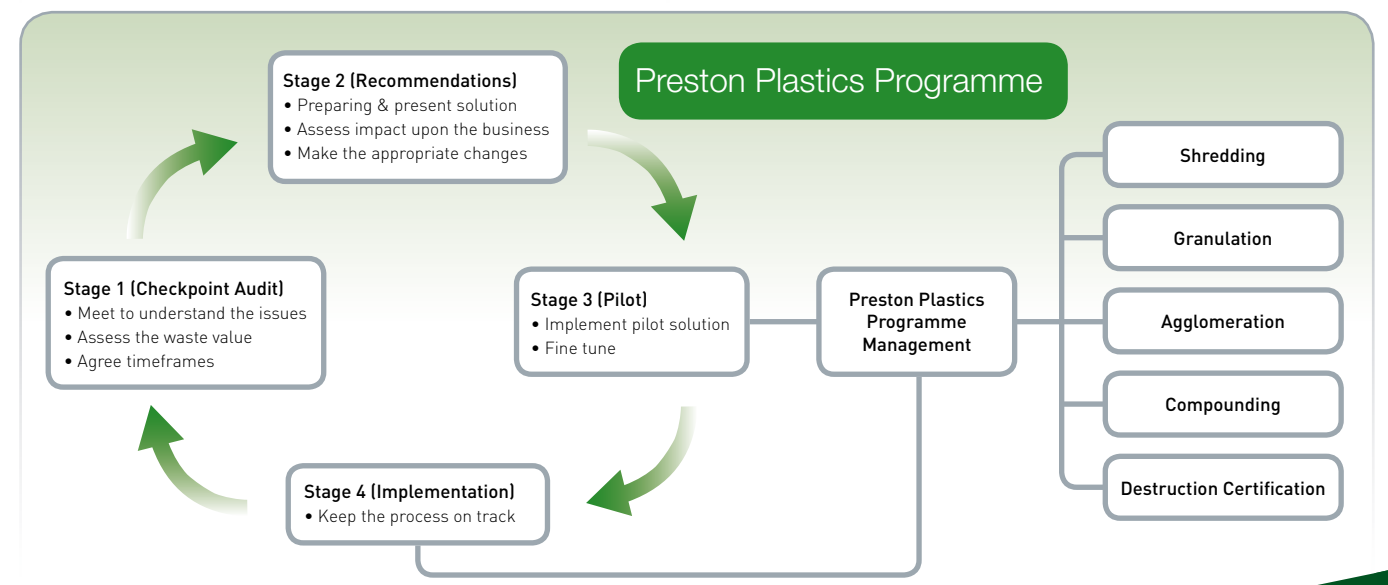

Everyone at Preston Plastics Ltd is not only very committed, but highly professional too. Our drivers offer a first class, prompt, efficient collection and delivery service direct to your site, ranging from small boxes, 4x4 stillages, curtain sided trailers to roll on, roll off skips.

We make sure our members of staff receive regular training in polymer recycling and Health & Safety, whilst maintaining strict quality assurance. And because our audit trail is open and honest you know exactly where your waste is going. It's no coincidence our 3-acre site is open 24/7 allowing you to visit us at anytime.

Recycling the un-recyclable

Preston Plastics Ltd specialises in polypropylene and polyethylene recycling. We have spent over 10 years analysing and researching contaminated, unrecyclable PP/PE originally destined for landfill. Through continued investment in the latest reprocessing technology, and our expert knowledge in packaging waste, we have a firm understanding of the complexities involved in your process. Preston Plastics Ltd has developed bespoke reprocessing systems that are unique to the industry in order to deal with the challenges you face. We guarantee to reduce landfill and add value in the form of great rebates.

We also buy a wide range of other polymers, in all formats including; MDPE, HDPE, ABS and HIPS and at great rates.

Preston Plastics Ltd specialise in processing all formats of polypropylene and polythene, whatever shape or size.

Working with names big and small

We have an unrivalled passion for green ethics and work hard with some great like-minded clients. From some of the largest organisations in the UK, to smaller independents – and they benefit from our excellent rates and prompt payment. Companies like Printpack, RPC Containers, Kimberley Clark, Proctor & Gamble, Co-operative food group, Mars UK, Graham & Brown and Pepsico. Now we can help you.

What we buy

- PP non woven fabric and spunbond
- PP Crates and baskets
- PP Buckets, HDPE Wheelie bins and dolaves
- PP/PE Reels and bales
- Mouldings
- Redundant off spec materials
- But Try us for other polymers you may have...

A secret is a secret

Preston Plastics Ltd boasts a 100% self-contained secure site for confidential destruction and reprocessing. The process includes a 30 day 24 hour night vision state of the art CCTV system that records every step of the waste materials movement throughout its recycling process. Preston Plastic Ltd has been fulfilling destruction orders and producing certificates for over 15 years. The materials frequently destroyed are but not limited to, sensitive promotional packaging, unreleased DVD cases and redundant stock to prevent counterfeiting.

What we offer

The supply of various types of industry standard containers:

- octy boxes
- 4x4 7x4 steel stillages
- bulk bags
- pallets
- 35/40 cubic yard roll-on roll-off skips
- Curtain side trailers

Not to mention:

- Triple vented, double filtered, full density repro PP pellets for injection moulding applications
- Available in jazz or black.
